WEEK'S LOSSES

GENERAL DECLINES NOTED ON THE NEW YORK STOCK EXCHANGE.

Chicago Gas Trust Figuring Largely in the Dealings-Local Grain Market Dull.

At New York, Saturday, money on call was easy at 1 per cent.

Prime mercantile paper, 3@51/2 per cent. Sterling exchange dull and firm, with actual business in bankers' bills at \$4.8614@ 4.66% for demand and \$4.85%@4.85% for sixty days; posted rates, \$4.86@4.861/2 and 4.87@ 4.871/4; commercial bills, \$4.841/4@4.841/2.

Circulation, increase...... 203,100 The banks now hold \$59,953,700 in excess of the requirements of the 25 per cent, rule. During the two hours of business on the Stock Exchange, Saturday, 80,000 shares changed hands, of which over 23,000 were of Chicago Gas, 9,400 Sugar, 5,200 Reading, 4,000 Distilling, 3,800 St. Paul and 3,200 Northern Pacific preferred. The transactions in no other stock exceeded 2,200 shares, and that figure being reached only in Louisville & Nashville and Richmond Terminal preferred. At the opening the trading was almost entirely in Chicago Gas, the sale of which was at 691/2, a decline of 11/8 from Friday. The pressure to sell was heavy and a further reaction to 69% was effected in the early dealings. The depression in the stock was ascribed to the reports current Friday of a prospective war of rates and growing strength of the opposition company, but there is a strong suspicion that the decline was manipulated in the interest of insiders, who desired to acquire stock at figures below prevailing quotations of the recent advance. This view of the situation was strengthened by the good buying at the decline on which the early losses were recovered and a gain of 1/4 per cent. el-

fected on the day, the stock closing strong within % of the highest point touched. Sugar fluctuated within a range of % per cent. The bears seemed rather afraid to go short on Sugar over Sunday, possibly fear-ing a squeeze, of which there was some talk on the board. Philadelphia selling de-pressed Reading, which broke 1% per cent. on a report that the receivers would demand that the unadjusted claim of the Lehigh Valley road for over a million dollars must be disposed of before the reorganiza-tion plans shall be agreed upon. The shares closed weak at the bottom figures of the day. Distilling was advanced % per cent. on the covering of a small line of shorts, reacting 1/2 when the buying had been effected, with a final recovery of 1/4, leaving an advance of % per cent. The granger shares moved irregularly. St. Paul was sold by London at the opening and subsequently by room traders, causing a decline of % per cent., without a recovery. The movement in the share market dur-

ing the week was irregular, but the ma-jority of the active list shows declines, compared with the figures of Saturday a week ago, Sugar being about the only notable exception. making a gain of % percent. The stocks which show an improvement are mostly those in which the transactions are usually limited. The more important changes were: Declines—United States Cordage preferred, 6 per cent.; United States Cordage common, 1%; Iowa Central preferred, 3%; Chicago Gas, 3%; Northern Pacific, 2%; Canada Pacific, 2%; General Electric, 1%; Distilling, 1%, and the grangers, 4,601%, the latter in Northwest. Advances—Norfolk & Southern, 7 percent.; Delaware & Lackawanna and Edison Electric, 5; Chicago & Eastern Illinois preferred, 4%; Susquehanna & Western preferred, 4%; Susquehanna & Western preferred, 4%; Toledo & Ohio Central, 3%; Northwest preferred, 2%; Delaware & Hudson, 2, and Jersey Central, 1%.

"There has been some reaction from the activity on the Stock Exchange immediately following the ending of tariff legis-lation; but nevertheless the improved tone of the market and the increased strength of values are fully maintained. It seems too early indeed to expect any really large and continuous speculative movement at the present stage of recovery. Confidence been sufficiently strengthened to prevent selling at the present range of prices; but we must wait for a fuller development of the general effects of the revival. and especially for a more continuous in-crease in the earnings of the railroads, before there is an influx of buyers sufficient to produce a really active specula-tive condition. Naturally enough, after such a period of depression and unsettlement, there is more or less of a cautious temper in every direction; and this shows fixelf in a disposition to take moderate profits. There is, however, none of that bsence of means for speculative transactions that usually proves to be one of the most stubborn after effects of a panic. On the contrary, the extraordinary case in money has brought into the market an unusually large amount of funds for employment in stocks as soon as the conditions become ripe for a general and marise in values: and, at a later stage, the purchases of this class of operators are likely to develop a very active campaign. In the theantime, however, there is a good basis for purchases on the breaks in prices, and the policy of quick turns for moderate profits is likely to bring satisfactory results. The market has the advantage of being much narrowed through the large amount of securities held in salspense by the reconstruction of so many large companies. Some of these readjustments are now nearing a settlement; and there is naturally a disposition among practiced operators to defer transactions until the market is stimulated by

these securities returning to their usual activity. "The government crop report on corn had at first an unfavorable effect upon the market. On second thought, however, the estimates are discredited as far too low. The recent unfavorable weather has no doubt put the former highest estimates beyond all hope of realization; but nobody, except a handful of bears, is prepared to accept an estimate of 1,100,000,000 bushels, which is about what the bureau's statement amounts to. It is very unfortunate that a depart-ment backed by all the prestige of the United States government should systematically put forth estimates upon crops amounting to close upon \$1,500,000,000 in value, which are generally found to be un-der the truth and misleading. The most charitable supposition is that the bureau of Agriculture is unavoidably exposed to errors or misrepresentations on the part of its agents which make it impossible to insure accuracy; but if that be the fact-and it probably is-there is all the more reason why that department should dispense with the superfluity of a statistician.

"Wall street is already beginning to oc-cupy itself with the prospects of the coming congressional elections. The main matter around which interest centers is the curthat that issue must come up for settlement, even though the session of Congress be the short one; and much interest turns on the question-how far the disposition of the next Congress may be changed on the currency question? The possibility that both parties, owing to party competition, may bid for the votes of the Populists is the main cause for any uneasiness on this account. It is, however, very possible that the influence of any mere Populist theories may be thwarted by Congress taking up the question next December and putting it through before the 4th of March. There has been no congressional action to show very clearly how congressional opinion stands upon the currency issue; but among members of the House who have been best situated to form a judgment there is a strong hope that it may be found possible to carry through, before next March, a meas-ure that will set at rest the silver and the fiat money crazes through putting our bank currency system upon a broader and more liberal and yet absolutely secure basis, and by substituting it for the 500,000,000 of governnt notes which now constitute the weak features of our monetary system. If this can be done the monetary complexion of the new Congress will be a matter of secondary importance. It rests very much with the men of finance-whose experience affords the best qualifications for guiding opinion on this question-to show the way towards an early and wise settlement of this vexed question. There are ways in which they can make their guidance influential; and in proportion as they discreetly use their power will be the chances of a final placing of the currency settlement beyond the reach of both sliver manlacs and Populists."

LOCAL GRAIN AND PRODUCE.

Week's Trade Hardly Up to Expectations, but Prices Were Stendy. The volume of trade in most departments in the week ending Sept. 15 was not up to that of the first week of this month, and a slow trade is looked for until the weather is cooler, although usually this month is a busy month with the wholesale houses. In prices the changes of the week were few. Provisions are ¼ of a cent higher. Irish potatoes are advancing on an active demand and lighter receipts. Sweet potatoes are plenty. Poultry is lower and eggs unchanged. In the fruit line the market is well supplied and some of the fruit is good. Hides are ½c higher, but it is uncertain if the advance can be maintained. The wool market is flat. In the tained. The wool market is flat. In the seed market something is doing. Clover is weak at quotations. The local grain market has dragged all

the week, attendance on 'Change being small and bidding dull, track bids at the close of the week being about the same as on Monday, ruling as follows:

To the Editor of the Indianapolis Journal: The following dispatch, signed by George W. Cooper, it is said, was read before the late Democratic State convention, and is too good to lose sight of:

"The President has signed my bill and I have the pen with which he wrote the signature. Cleveland pens are mightier than swords. They strike off shackles and strike down shams. They strike for liberty, hearth and home."

For a piece of unmitigated gall this dispatch certainly takes the cake. The most pronounced feature of it is the exhibit of a superabundance of egotism and self-conceit; the quintessence of a "popgun" Congressman. Look at it-"My Bill"-"George William Cooper." People who know George William Cooper are not surprised at this cunning attempt to cover up his treachery and "party perfidy" with the voters of the Fifth district. But, never mind; on and after the 6th of November the voters of the district will "strike off the shackles" and "strike down the sham" George William, and his scalp, with Grover's little pen, will be found dangling at Overstreet's belt, and George William, along with the remnant of his party, will be swept and buried out of sight by the political ava-lanche that surely awaits the Democracy

Franklin, Sept. 15.

WHEAT AND CORN WENT OFF 3-Se AND PORK DROPPED 27 1-2c.

Heavy Receipts of Corn and Large Estimates for Next Week Maintained a Weak Market.

CHICAGO, Sept. 15 .- Corn was weak today on heavy receipts, and wheat meekly followed. They both ran down another %c. Provisions were smashed by the virile blows of the heavy packers, pork closing at a decline of 271/2c, lard .20c and ribs .15c. The oats market followed its own bent and closed 4c higher than yesterday. Wheat opened very weak; December, which closed yesterday at 56%c, and that

was the bottom of a %c decline, sold a

moment after the start this morning at 56c. The corn market was suffering from what the speculators chose to regard as very heavy receipts of that article, and the Northwest reported a considerable increase in the number of carloads of wheat at Minneapolis and 'Duluth. Those were the influences which inaugurated the weakness in wheat here. The cables returned reflections of the weakness which prevailed here yesterday. Bradstreet's gave the export clearances of wheat and flour from both coasts for the week at 2,789,000 bushels, against 3,207,000 on the week previous, and compared with 5,367,600 on the corresponding week of last year. Business was of moderate activity. A good deal of scalping long lines came out at the opening and the chief support after that appeared to come from buying against puts and covering by shorts. The fluctuations kept virtually within the range of 56c and 56%c. Exports of wheat and flour from the Atlantic seaboard for twenty-four hours amounted to the equivalent of 440,-000 bushels. Primary market receipts, including those at Kansas City, amounted to 909,000 bushels. The estimate that to-day's liberal receipts of corn would be repeated on Monday, and rumors that the receipts of wheat at Minneapolis were likely to be 1,200 cars on the same day, prevented any change in the heavy feeling which has prevailed all day. The price kept bump-

close and finally rested at 56@56%c. Corn was weak early, heavy all day and limp at the close. It did not, however, sell lower at any time than it did immediately at the opening. Receipts of 600 cars this morning exceeded the estimates by fifty cars, and the prediction that, on Monday, another 600 cars would be found on the inspection sheet added to the selling inclina-tion evinced by the local speculators. A good deal of long corn came on the market and shorts gathered it in. Boyden & Co., Parker and Baldwin-Farnum were con-spicuously active buyers. May opened at from 52%@53c, recovered to 53%@53%c, broke off to 53c, rose to 53%@53%c, tumbled back again to 53c and closed at 53c bid. Oats were quiet throughout the entire ses-

ing on 56c for December not far from the

sion. A firmer feeling was noticeable, influenced by a better disposition to buy. September ranged from 30%c bid to 30%c, closing at 30%c bid. May started at from 35% to 35%c, sold up to 36c and closed at 35% 035%c. The receipts, of hogs at the yards were only 9,000, but the quality was reported to be poor, and the price from 10c to 15c lower than on the day before. The weakness of

corn and wheat gave the additional en-couragement and the packers did the rest. Freights—To Buffalo, 1%c for wheat; 14c for corn and 1%c for oats. Estimated receipts for Monday: Wheat, 70 cars; corn, 600 cars; oats, 270 cars; hogs, Leading futures ranged as follows:

 Elsewhere. CHICAGO, Sept. 15 .- Only 500 head of native cattle arrived and trade was almost at a standstill. The bulk of the supply consisted of 2,000 Texans, nearly all of which went direct to slaughterers. The demand was very indifferent for the few Texans on sale and buyers bid a point lower all around. The few small sales were made at \$2.50@2.85 for steers, and colors around \$75. There was no trade around \$3.75. There was no trade of importance in native steers, a few lots of cheap beef steers went to local butchers around \$3.80, and cows and mixed lots were cleared chiefly at \$1.50@2.60. Liberal receipts were generally predicted for Mon-

day.

There was a slump of 15@25c in prices for all grades of hogs to-day. The 10,000 fresh arrivals and stale holdings of about 8,000 head proved too great burden for the mar-ket. Buyers were not eager for trade at the decline, and business dragged from start to finish, the most unsatisfactory market in several weeks. Fancy 266 pound hogs sold up to \$6.50, but there were few sales above \$6.25. Best light sorts could be bought at \$6 and inferior grades of light around \$5. Most of the useful packing hogs were bought at \$5.75@5.90 and plain lots around \$5.60. About 5,000 head went over unsold, the market closing weak and flat

at the big decline. In sheep less than 1,000 head arrived for to-day's market. There were many lots of stale stock scattered around the pens, but these met with no demand and were nearly all left unsold. The only sale of impor-tance was that of 650 choice mixed Montana feeders, averaging 98 pounds, which were taken out by an Ohio feeder at \$2.70. A few small sales of thin mixed stuff were made at \$1.25@2. Late sales of good mutton have been chiefly at \$2.60@2.90, with a few extra quality at \$3.10. Best lambs are quotable at \$3.75@4, and fair to good grades at \$3.20@2.65. Receipts—Cattle, 2,500; calves, 200; hogs, 11,000; sheep, 71,000.

How Bynum Gets an Audience. To the Editor of the Indianapolis Journal: I notice, in reporting Bynum's meeting at Anderson, the Journal says all the old stand-bys were out. This is how they got them from this neighborhood: Bynum wrote each one a personal letter stating he had been appointed vice president of the meeting and not to fail to come and take his place on the platform. They all went from here, and found the platform
